

Project Name: Haven

Type: Minimal Social Connect App

Purpose: To create a clean, distraction-free platform for users to share, connect, and chat without ads or unnecessary features.

Summary: Haven is a minimal social connect app designed to provide a clean, distraction-free space for users to share, connect, and chat. Unlike mainstream platforms crowded with ads and unnecessary features, Haven focuses only on the essentials. Its goal is to deliver a professional, simple, and trustworthy experience that helps users build meaningful connections without clutter.

Core Features:

- Simple feed with posts from connections
- Lightweight messaging for quick communication
- Minimal profiles with essential details only

Design Approach:

- Minimalist UI with clear typography and soft colors
- Focus on usability, clarity, and professional aesthetics
- Streamlined navigation for efficiency

Target Audience: Students, young professionals, and design-conscious users.

Young Professionals (20–35 years) People who want a platform that feels professional yet simple — a space to connect with peers, share updates, and message without distractions.

Students (18–25 years) They prefer lightweight apps with easy onboarding, simple posting, and messaging for group projects or casual sharing.

Design-conscious / Minimalist Users Individuals who value clean UI, trust, and focus. They are frustrated by cluttered mainstream apps and want a distraction-free environment.

Problem: Most social apps today feel cluttered with ads, extra features, and distractions. Users often just want a clean way to connect, share, and chat without noise.

 Main Pain Points

1. Cluttered Interfaces
 - a. Too many features (stories, reels, marketplace, ads).
 - b. Feeds feel overwhelming and hard to focus on meaningful updates.
2. Information Overload
 - a. Suggested content, trending topics, and irrelevant notifications distract users.
 - b. Users struggle to find posts from people they actually care about.
3. Ads & Commercialization
 - a. Ads break trust and make the experience feel less personal.
 - b. Monetization-driven design reduces simplicity.
4. Complex Navigation
 - a. Multiple menus, tabs, and settings make apps feel heavy.
 - b. Users want quick access to posting, connecting, and messaging.
5. Lack of Trust & Privacy
 - a. Concerns about data misuse and unwanted exposure.
 - b. Users prefer a safe, professional environment.
6. Time Consumption
 - a. Endless scrolling and addictive features waste time.
 - b. Users want lightweight interactions that don't trap them.

Goal: Create a minimal social connect app that focuses only on the essentials — posting, messaging, and connecting — with a professional, simple design.

My Role

- UX/UI Designer: Led the design process from research to final prototype.
- Researcher: Conducted competitive analysis and created personas to identify user needs.
- Information Architect: Defined user flows.
- Visual Designer: Built the design system (colors, typography, components) and crafted polished screens.
- Prototyper: Developed interactive prototypes to test usability and refine the experience.

Persona 1: Amraha (Designer)

- Age: 25
- Occupation: Junior Designer
- Location: Punjab, Pakistan

- Goals: Share creative work, stay connected with peers, use a trustworthy platform.
- Pain Points: Distracted by ads and clutter in mainstream apps, dislikes unnecessary features.
- Needs: Clean feed, simple profile, lightweight messaging, no ads.
- Quote: “I just want to see updates from people I care about without distractions.”

Persona 2: Ali (Professional)

- Age: 28
- Occupation: Software Developer
- Location: Karachi, Pakistan
- Goals: Quick networking, lightweight messaging for collaboration, professional tone.
- Pain Points: LinkedIn feels heavy, Instagram too casual, too many irrelevant notifications.
- Needs: Fast onboarding, simple feed, efficient messaging, minimal settings.
- Quote: “I need a platform that helps me connect and coordinate without wasting time.”

Persona 3: Fatima (Student)

- Age: 21
- Occupation: University Student
- Location: Lahore, Pakistan
- Goals: Stay connected with friends, share casual updates, group project chats.
- Pain Points: Instagram feels addictive, too many features she doesn't use, privacy concerns.
- Needs: Friendly design, easy posting, lightweight notifications, safe environment.
- Quote: “I want a simple app that feels safe and easy to use.”
